Profile Summary

A highly motivated BSc (Hons) Software Engineering graduate with a strong foundation in building scalable web and mobile applications using the MERN Stack and Java/Spring Boot. Passionate about DevOps methodologies, focusing on streamlining the Software Development Life Cycle (SDLC) through automation and CI/CD principles. Experienced in managing version control via Git and deploying applications to Cloud environments. Dedicated to bridging the gap between development and operations by ensuring code reliability, optimizing deployment workflows, and maintaining robust infrastructure for high-impact digital solutions.

Education

BSc (Hons) degree in Software Engineering

Cardiff Metropolitan University (ICBT Campus) 2.1 - 2nd Class Upper Division (2024-2025)

Higher Diploma in Computing & Software Engineering

Cardiff Metropolitan University (ICBT Campus) Merit Pass (2022-2024)

G.C.E Advanced Level Exam

Mahinda Rajapaksha College

G.C.E Ordinary Level Exam

Kamburupitiya Maha Vidyalaya

Technical Skills

DevOps & Automation - Docker (Basic Understanding/Containerization), CI/CD Pipeline Concepts, SDLC Methodologies, Workflow Automation.

Version Control - Git, GitHub (Proficient in Branching, Merging, and Versioning).

Cloud & Deployment - Knowledge of Application Deployment on Cloud Platforms (Vercel, Render, AWS Basics).

Web Development - MERN Stack (MongoDB, Express, React, Node.js), Java, Spring Boot, PHP.

Languages & Scripting - JavaScript, Bash/Shell Scripting (Basic), HTML, CSS, Tailwind CSS, Bootstrap.

Databases - MongoDB, MySQL.

Design & Collaboration Tools - Figma, Photoshop, Illustrator, Premiere Pro, ClickUp, Miro, Microsoft Teams, Zoom.

Professional Experience

Digital Services Intern | LOLC, Sri Lanka

During my internship at LOLC, I coordinated the rollout of iPay digital banking and credit card solutions, focusing on product delivery and customer adoption. I acted as a key link between the product features and the end-user, managing stakeholder communication and gathering user requirements to improve the digital experience. This role helped me develop strong skills in deadline management, problem-solving, and cross-team coordination in a fast-paced corporate environment.

Languages

English

Sinhala

Projects

● Final Year Project: Vortex Cinemas Movie Theatre Website

Engineered a robust movie booking system using **PHP** and **MySQL**, integrated with a **mobile-first Bootstrap frontend**. I led the development of the centralized **Admin Dashboard and secure authentication**, optimizing the relational database to ensure high performance and a seamless user experience across all devices.

● Online Ticket Reservation System

Architected a scalable, high-performance modular backend using **C#**, applying Clean Architecture principles for long-term maintainability. I developed secure **RESTful APIs** for client-server communication and managed the technical roadmap to ensure a production-ready, extensible system.

● Car Rental System

Developed and deployed a full-stack car rental platform leveraging the **MERN stack**, featuring a component-based **React frontend and a Node.js/Express backend**. I implemented Role-Based Access Control (RBAC) and managed the full DevOps lifecycle, including professional **deployment on Render**.

● ABC Restaurant Management System

Built a full-stack food ordering and table reservation platform using **React.js and Tailwind CSS** for the frontend, and **Spring Boot with MySQL** for the backend, featuring secure authentication, real-time query handling, and a business reporting dashboard.

● Fluffy Mobile Application

Developed a **native Android** pet-sitting app in **Java** with user profiles, real-time booking, in-app communication, and optimized **MySQL-based data management**.

Certifications

UI / UX for Beginners | Great Learning Academy (December 2024)

Python | Kaggle (November 2024)

Adobe Photoshop | Mastor Academy (2022)
